FLWRDWN NWP

THE FUTURE OF WARMTH

ABOUT FLWRDWN NWP

FLWRDWN™ NWP is a Bio-based padding, made using a combination of **wildflowers**. Wildflowers are grown without any pesticides or artificial irrigation, preventing pollution and saving water. They are combined with a fully **compostable biopolymer** and a patented **cellulosic aerogel** that bring out the thermal-warming properties, creating an innovative mix.

FLWRDWN™ NWP mix is blended with Tencel, an innovative and natural fiber that comes from responsibly sourced wood, and **PLA**.

This blend has exceptional comfort without any additional treatments or use of water.

This padding is:

- ✿ animal-friendly
- ✿ environmentally friendly
- ✿ animal cruelty-free
- ✿ warm
- ✿ light
- ✿ breathable

IMBOTEX & PANGAIA

IMBOTEX SRL, a leading manufacturer of innovative technical and natural paddings, and **PANGAIA**, a materials science company bringing breakthrough textile innovations and patents, combine their skills to develop and produce a new and natural **FLWRDWN™ NWP** padding.

The two companies intend to integrate their respective expertise and know-how to design new products based on sustainability and innovative elements.
